

## ORLEN OIL AGRO U

### General features:

High-quality, mineral, hydraulic and gear oil of the UTTO / THF type, intended for the lubrication of the drive train, also with the so-called with wet brakes and as a working fluid in the hydraulic system of tractors and agricultural machines.

### Application:

- it guarantees optimal protection of the surface of the lubricated elements,
- high level of anti-foam properties,
- high ability to release air,
- it ensures the cleanliness of the lubricated systems,
- protection against wear and ensures the durability of the lubricated parts of the systems.

### Standards, approvals, specifications

#### Meets requirements:

John Deere J20C

#### Physical and chemical properties

Parameters	Unit	Typical values
kinematic viscosity at 100 °C	mm <sup>2</sup> /s	10,0-11,5
viscosity index	-	95
Brookfield viscosity at -180C, not higher than	mPa*s	9000
ignition temperature	°C	230
flow temperature	°C	-24
<b>Note:</b> Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each production batch.
